**Attachments:** Cadmus evaluation of CES responses to RAI 3 (modeling and operations) 1-26-21(DA).docx; Cadmus evaluation of CES responses to RAI 2 (FR and ERR) 1-26-21(DA).docx; Evaluation of responses to RAI 4 (Construction) 1-26-21(DA).docx; Evaluation of responses to RAI 4 (TM) 1-26-21(DA).docx; Evaluation of CES response RAI 1 (Site characterization) 1-26-21(DA).docx

Hi Calvin, I've gone through each of the 5 documents and made a few edits and suggestions. One theme is making sure we are clear on the timing of anticipated revised plans/submittals. In some cases we mean after construction and before authorization to inject while in other cases we mean now, before we can issue an ATC permit. I just don't want there to be any confusion on their part as to our expectations about timing. Overall, it seems like we are very close to resolving all technical questions/issues, which is good but puts more emphasis on those non-technical items that are critical to being able to issue a draft ATC – financial assurance, ESA/NHPA compliance, tribal consultation in particular. Also, I have lost track of where we are on the CBI issue; this is something that will need to be resolved before we go out for public comment.

Good job on this! Let me know if you have questions or wish to discuss any of my comments. I will review the transmittal letter and get any comments to you by Monday.

Thanks,  
David

Hi David,

Attached for your review and comments are the cover letter and its enclosures of our follow-up tech review comments and information request for CES.

Please note that only the portions of these documents named "EPA Evaluation of Response" and "Follow-up Question/Request for CES" provided in red text are new materials and needed to be reviewed.

Thanks,  
Calvin
